

Navigate to www.londonbiotopes.com and put your tapwater on the map.

NW11 H₂O

Due to it's special community, Golders Green is the area with the lowest use of birth control hormones. This refreshing and fertile water is therefore ideal for couples with difficulties conceiving, men having virility problems or just anybody looking for true natural water.

W11 H₂O

From the colourful North Side of Notting Hill comes water slightly enhanced by high-quality cocaine and gentle fumes from the Westway. A truly glamorous urban water.

W11 H₂O

This water comes fresh from taps in Notting Hill, one of London's healthiest districts and an area where the majority of people eat organic food. Expect this water to be free of chemical food additives and pesticides: a truly healthy and organic experience!

SW3 H₂O

This water from local sources in Chelsea, contains a rich variety of anti-depressants.

NW1 H₂O

The hills towards Camden produce this very taste water, rich of MSG from the 'tasty corners' and with a hint of burned wood from the Hawley.

EC2A H₂O

The City of London houses the most ambitious and successful businessmen and women in the UK. This results in a vitalising water, enhanced with fluoride and traces of various stimulants like: coffee, cocaine and anti-depressants. EC2 H₂O is water for the moments when performance really counts.

N16 H₂O

The people of Stoke Newington mostly eat natural and organic food, resulting in natural water. It also contains traces of marihuana for a true relaxing experience.

EC1M H₂O

Shoreditch water is very smooth and energising due to traces of yeast and stimulants, providing you with confidence and youthful attitude.

E8 H₂O

Central Hackney produces a varied water with traces from cheap stimulants provided by the community of poor artists and calpol from the many babies in this area.

E2 H₂O

Tower Hamlets water is a diverse and exciting water. Dangerous at times, but usually flavoured with aromatic spices and goes well with a vegetable samosa.

E9 H₂O

On the north side of Victoria park lie the sources of a very stimulating water with traces of chemical food additives and powerful stimulants.

SE14 H₂O

Straight from the hills of South East London (Telegraph Hill), purified as it rolls along the valley in the gutters with a hint of local additives like gunpowder, blood and various drugs. New Cross water is unbeatable!
